# THE MISSOURI MINER

Missouri School of  Mines & Metallurgy

VOLUME 29

FRIDAY, APRIL 2, 1943

NUMBER 47

## Harry Scott Voted President Of Blue Key

The Missouri School of Mines chapter of the Blue Key, national service fraternity held its annual election in the club room. Tuesday night March 30, at 7:30. It was marked by the election of Harry Scott as president replacing Charlie Mitchell. Harry is well known on the campus having been sophomore class president. He is a Junior Chem and is a member of Alpha Chi Sigma. He was elected to the Miner Board as a member of the circulation department.

Elected as Secretary-Treasurer was John Van Os. John is a Junior. He is a member of Alpha Phi Omega, Theta Tau, and is also on the Miner Board.

Jim Dowd was elected as vice-president of the organization. Besides being known as the brain of the campus Dowd belongs to Theta Tau and he is Secretary of Tau Beta Pi. He is a Junior Met.

Al Dick was elected as corresponding secretary. Al is a Junior Met. He is Captain-elect of the football team and he is rated as one of the best players in the conference. He is also president of Kappa Sigma social fraternity and he is a member of Theta Tau.

The war has put quite a dent in the membership of Blue Key. Of the seventeen members of the fraternity, only eight are expected to be in school next semester. While the outlook for keeping the fraternity going through the war is not good, the members will make every attempt to keep it running. The Blue Key has done much to further the cause of school citizenship in the years since its organization on the campus. It is to be hoped that such a commendable organization will be continued as long as possible in our school.

It is the hope of the Blue Key fraternity to continue in its former strength after the war is over. Towards this end Charlie Mitchell the former president has drawn up a plan whereby this can be made possible. In the event that the fraternity has to fold up for the duration it is planned to leave its organization to a group of interested faculty advisers who will start it again after the war is over. These men are: Mr. Hubbard, Professor Dennie and Lt. Shanks.

Since the army is planning to send a large number of selectees for engineering training it is hoped that these men will take a part in our school activities. While these men will not be able to join the Blue Key, because only Juniors and Seniors are eligible it is hoped that other organizations on the campus might admit them.

We'll give you one guess as to whom you can blame if success looks you over and then overlooks you.

## Miner Board Elects Sixteen Men to Staff

At its second semester election Wednesday evening, the MINER Board elected sixteen new members. The number elected was smaller than usual due to the fact that the MINER'S qualifications have been raised and that students seem to be losing interest in extra-curricular activities.

Elected to the editorial staff were the following: Gerson Ginzberg, Warren Larson, LeRoy Markway, Glen Jost, Ralph Goorevich, Bob Barmer and Dick Mattee. To the Business staff: John Weber, Harry Kuhn, William Jones, and Leonard Dieckman were elected. William Herrmann, Tom Vogenthaler, William Barnett, John King and Steve Salarno.

It is hoped that the students remaining on the campus will gain interest in the MINER and continue it for the duration.

## Alpha Chi Sigma Plans Activities

Alpha Chi Sigma, professional chemical fraternity, at its meeting last Tuesday evening decided to hold its annual spring outing Saturday, April 17.

The safety committee of the chapter announced that the first aid kits in the various chemical stock rooms have been replenished and that new safety charts will be hung at prominent places in the laboratories.

The fraternity also made plans for the spring issue of the Beta Delta Data which is the local chapter publication.

## Music Club

Beethoven's 3d symphony, the "Eroica," will be the feature work of next Sunday's Music Club meeting. This work was originally named in honor of Napoleon Bonaparte during the period of his European conquest, but when he declared himself Emperor of France, the disillusioned Beethoven henceforth regarded the symphony merely as a dedication to a great hero. Beethoven considered this work to be his finest. The Music Club is proud to present the latest recording of the work by Bruno Walter and the New York Philharmonic Orchestra.

Dimitri Metropolis and the Minneapolis Symphony Orchestra will present a second work by Beethoven, the Leonore Overture No. 3. In a lighter vein the program will include the delightful serenade "Eine Kleine Nachtmusik" by Mozart, played by Felix Weingartner and the London Symphony Orchestra.

## Tau Beta Pi Pledges Honored

The members of the Beta Chapter of the Missouri Tau Beta Pi held their semi-annual Spring banquet on Thursday evening, March 25, at the Parish house, Episcopal church. The formal initiation of the new members took place immediately preceding the banquet. The following initiates were honored at the banquet: Albert S. Keevil, Richard S. Mateer, Paul G. Smith, Daniel J. Stocker, all members of the Junior class.

The toastmaster of the occasion was Warren Helberg, president of the Tau Beta Pi, who introduced the main speaker of the evening, Col. Austin L. Anderson. Col. Anderson, from Fort Leonard Wood, told about the inner workings of the U. S. Army.

Rev. Jackson of the Episcopal church, discussed the possibility of M. S. M. receiving a large sum of money from an estate. The gentleman who left the estate specified that the money should be used to build a school of technology in the state of Missouri. Rev. Jackson, Mr. Hubbard, and several others are trying to claim this money for the School of Mines.

The banquet had as its honored guest, Dean Curtis Wilson. Several graduate members of the Tau Beta Pi also attended the banquet.

## Draft Authorities Condemn Generation As Being "Softies"

(ACP)—Coddling of the nation's youth by automobiles, double feature movies and the radio is reflected in a recent war manpower commission announcement that more than 40 per cent of draft registrants are being rejected, according to Prof. Leon Kranz, head of Northwestern university's department of physical education.

Prof. Kranz, who was a lieutenant in the army air corps during World War I, says the rejection rate of 35 per cent during that war was serious enough, but that the current rate offers challenge to educational and health authorities. He maintains that many defects which show up in the prime of life originate from unhygienic practices during childhood.

"Before gas rationing it was a common practice to see youngsters riding to school in the family automobile," he said. "They sit through three or four hours at a stretch in the movies and then lounge before the radio for several hours. These practices are going on at a time when the youngsters should be building bodies for the future."

"We are not beginning in this country to do a proper job of training our youth in helpful physical pursuits."

(Continued on Page 4)

Anyone interested in the program is cordially invited to attend the meeting at 7:30 p.m. Sunday in the Physics Lecture room in Norwood Hall. Bring your gal!

## "Time Is Essence", Says G. S. Russell At ASCE Meeting

Mr. George S. Russell, president, Russell and Axon Consulting Engineers of St. Louis, spoke at a meeting of the student chapters of MSM and Missouri University at the spring meeting of the student chapters and the Mid-Missouri Section of the Am. Soc. C. E. last Friday evening, March 26, in Harris Hall.

Mr. Russell chose as his subject "Time is the Essence." His talk dealt with the value of time in fulfilling engineering war contracts during the present emergency. He illustrated his talk with many examples taken from the present experience of his consulting firm in the construction of cantonments, air fields, housing projects, water and sewage plants and other utilities for the armed forces.

As an example of the small amount of time allowed engineering firms for the construction of projects, Mr. Russell cited the case of an airport two and one-half miles square covering 2300 acres with 5000 ft. runways, all buildings and warehouses, wells, water system, sewers and sewage disposal facilities and all other utilities necessary to make up a completed airport plus the grading of five auxiliary fields which was completed in 60 days.

Mr. Russell spoke briefly on post-war planning. He felt as though there would be a great amount of construction work carried out because of the fact that many concerns now have a backlog of work which they cannot perform because of priorities. There will be a demand for engineers in both Europe and South America.

This meeting brought together many outstanding engineers in Central Missouri to visit with the students. In addition to Mr. Russell, among those present were: C. W. Brown, Chief Engineer, Highway Department; P. H. Daniels, Engineer of Surveys and Plans, Highway Department; W. J. Schulten, surveys and Plans, Highway Department; S. M. Rudder, Assistant Chief Engineer, Highway Department; E. C. L. Wagner, Manager, Missouri Associated General Contractors; C. P. Owens, President, Missouri Society of Professional Engineers; W. S. Frame, Union Electric Company Engineer, Bagnell Dam; C. L. Sadler, Division Engineer, U. S. Geological Survey; Dean Curtis L. Wilson, Missouri School of Mines, and many others. However, most of the above list represents out-of-town visiting engineers.

The officers of the Mid-Missouri Section, A. S. C. E. in attendance were, S. M. Rudder, President; E. W. Carlton, First Vice-President; W. S. Frame, Second Vice-President; W. J. Schulten, Secretary-Treasurer; Wm. C. Alsmeyer, Junior Director.

## Theta Tau Pledges Fourteen New Members

Iota Chapter of Theta Tau, Professional Engineering Fraternity, pledged fourteen new members at its spring election last Friday evening. The final phase of Theta Tau's unique selection system lasted nearly five hours.

Theta Tau is a professional fraternity to which members are selected on the basis of personality, leadership, and scholarship. Personality, which is the main contribution to success in engineering is considered highest in qualifications for membership. The fraternity's purpose is to develop and maintain a high standard of professional interest.

The new pledges are listed below:

Harold Butzer, junior Civil; Theta Kappa Phi fraternity; managing editor of the MINER; A. S. C. E. Secretary; Cadet Sergeant, advanced R. O. T. C.

James Dowd, junior met; Engineer's Club; Treasurer A. I. M. E.; Blue Key; Tau Beta Pi; Scholastic leader spring '40-'41, fall '41-'42, spring '41-'42; Blue Key Award, '42; Phi Kappa Phi Book Plate '42.

Carl E. Finley, sophomore E. E. Engineer's Club; managing editor of the MINER; Engineer's Club Board of Control; Detonators; James' Scholarship; A. P. O. pledge; scholastic leader fall '41-'42, spring '41-'42; Blue Key Award; Phi Kappa Phi Book Plate.

James Fraser, junior E. E.; Engineer's Club; Phi Kappa Phi Book Plate; Blue Key Award; James' Scholarship; Independents' Board of Control; scholastic leader fall '41-'42, spring '41-'42, summer '42.

Louis Hartcorn, junior met; Pi Kappa Alpha fraternity, treasurer '42-'43; MINER Board; St. Pat's Board.

William Hicks, junior mechanical; Tech Club; transfer from Central Wesleyan College, Mo.

Bob Jamison, Junior E. E.; Lambda Chi Alpha fraternity; Rollamo Board; Alpha Phi Omega; Student Council Alternate; Scholastic leader spring '41-'42, summer '42.

Joe Jenkins, junior Met.; Kappa Sigma fraternity; transfer from Maquoketa Junior College, Iowa.

Paul Hennekes, Sophomore E. E.; Tech Club; St. Pat's Board Alternate '43.

James J. McGovern, sophomore Mechanical; Tech Club; Independents Board of Control '41-'42, '42-'43; A. S. M. E.; Student Council alternate; St. Pat's Board; Blue Key Award; scholastic leader fall '41-'42.

Jose McClinton, sophomore E. E.; Lambda Chi Alpha fraternity, vice - president; Interfraternity Council; Rollamo Board; scholastic leader summer '42.

Bob Ray, sophomore Met; Engineer's Club sophomore class treasurer; Independent Board of Control; Student Council, Intramural Board; scholastic leader fall '41-

## "Keep Off the Grass"

With the coming of Spring, it is again time for the student body to concentrate on their efforts to protect the young blades of grass that are beginning to sprout out all over the campus. In the past the students have shown the true Miner cooperation in this respect, and in giving the grass a chance to grow have made the MSM campus one of which we are proud. However, there are several unsightly spots on the campus, where students have made the practice of adhering to that old theorem in geometry, "the shortest distance between two points is a straight line", and as a result a hard path is worn to Mechanical Hall and across the lot in back of the new Chemistry Building. The school is doing its part by rolling and seeding these spots as well as the entire lawn, so now it is in our hands whether or not MSM will have a beautiful, green campus or a barren clay field.

The A. P. O. fraternity which has in the past been responsible for the "Keep Off the Grass" campaign is again promoting this drive. Members have repaired, repainted and made new signs, which they have placed on crucial spots throughout the campus, as a friendly reminder to keep off the grass. This organization has spent considerable time and effort on these signs and the only thanks they ask is that we make this drive a success. They also hope that the "Keep Off the Grass" signs be left unmolested, as it is becoming increasingly difficult to obtain the material used in making these signs.

As a  
MINER  
Sees it

Steve Hasko and Bernie Cohen were called up since they were ceramists, not vital to the war effort. Steve got his refund from the school and left town on the lam. Bernie had his dough in his hands when he let it slip that they were not being drafted, but rather called to active duty. That was a horse of a different color and the school took its mazuma back, and have been frantically trying to get in touch with Steve. Good boy, he has a good start and so far has succeeded in hanging on to that kale.

Eunice "G. P." Mitchell is picking her own men these days, even to the extent of asking them to take her places. It is heartening to see that she has finally let her hair down and shown her true colors.

At 2:17 April 3 our "suitcase-boys" will haul out of our fair Rolla. Here are a few of the many Ozark wenches who are going to be once again dateable to the Miners. Maxine Lockart, Wanda Remmert, Irene Underwood, Lil and Phil Carrol. Now truthfully gals, even though those guys were novel, don't you miss good old Rolla style?

"Butchie," our classy looking suitcase gal will also be leaving. She is one of the very few living combinations of brains and looks known to engineering. We hate to see this addition to our campus wandering off.

The Theta Kaps lost to Sigma Pi in baseball and consequently had to buy the beer for the affair. Al Thorwegan (twice in a week he has been news) was the only sober member of the bunch, and he came home pantsless, which just goes to prove that temperance doesn't pay.

Ellison was caught napping the other night at the lecture. He wanted to know how two locomotives in tandem were synchronized, only he asked how they were "syncopated". Good to see you out on a limb just once Prof.

Did you hear about the guys who put their dates on the St. Louis train and the train started before they could get off? They taxied from St. James. The locomotive driver sure must have been a hell of an engineer.

It is just about time for a vigorous campaign to keep off the grass. It would be a good idea to have the affair going full blast when the new signal men hit town. I'm sure they will help us in our effort to keep the campus beautiful if they are given a chance.

The Theta Tau beer-bust was a grandiose brawl. The main topic of discussion was whether or not metallurgists make the world go around. The matter is still open to debate.

Which leads into this plea. For Pete's sake lets have our politicians get together and unify the student body. We must have leaders to get in and pitch for us. There is so much cause for dis-sention, fellows leaving, new men coming, the uncertainty of our very existence etc. This is the time for the student council, backed by might of Theta Tau to straighten out this dilemma of rumors and misinformation. A good mass meeting is imperative in the near future. It would be a good time for the school to break its official silence and let us in on what is

## Church Services in Rolla

## Episcopal Church

Rev. O. V. Jackson, Rector 10th &amp; Main Sts.

Church School 9:30 a. m.

Church Services 10:45 a. m.

Young People Service 5:30 p. m.

The Rector, Rev. O. V. Jackson, and members of the Episcopal Church in Rolla are happy to share with all other churches the privilege and opportunity of serving the students at the Missouri School of Mines and Metallurgy. The primary function of the church is to provide adequate facilities for instruction, worship and practice of the Christian Religion. The regular expression of one's Christian faith in the worship of God is as necessary for the

cultural and spiritual life as food is for the body or systematic study in secular studies for the development of the mind. Without these spiritual exercises no personality is integrated for efficient living.

Special lectures on the Bible and history of Christianity are regularly scheduled during the Lenten season and other periods in the Church year. Students are encouraged to attend these lectures.

The Church welcomes students to fellowship in the worship services, in the various activities of the Parish, and in counsel with the Minister.

# Juniors Trounce Triangle To Take Lead in Volleyball

By HARRY GILLILAND

With the Intramural Volleyball tournament nearing a climax, the predictable juniors have taken the lead and will be the team to watch in the finals. Triangle fraternity is running a close second, along with Kappa Sigma, the seniors, Sigma Nu, Theta Kappa Phi and the Freshmen. Final elimination will take place next Monday and Tuesday nights.

A brief resume of this week's games: Two games were scheduled for last Friday night, but Sigma Nu forfeited to Pi Kappa Alpha, and Kappa Alpha forfeited their game to the Freshmen.

Play was resumed on Monday night with the Kappa Sigma team taking an easy victory over Lambda Chi in the first tilt of the evening. The scores for the game were: 15-2 and 15-10. Fuchs, and Clark were the "mainstays" for Kappa Sigma. In the second game the Juniors tramped the Seniors to the tune of 15-4 and 15-9. This Junior team is headed by Moore, Liddell, Seibert and Kallmeyer. Leone and Seibert led the Seniors.

Tuesday night the Triangle defeated Theta Kappa Phi by a score of 15-2 and 15-8. It was the third consecutive victory for the Triangle fraternity, and gave them possession of first place in league competition. In the second game, Sigma Nu took an easy victory over Pi Kappa Alpha. The scores

for this game were: 15-5 and 15-7.

On Wednesday night the Kappa Sig's defeated the Sophomores 15-6 and 15-9 in a hard-fought battle. In the second game the Juniors defeated Triangle in what proved to be the best game of the tournament. Both teams were playing exceptional ball, but the Juniors finally won by the score of 17-15 and 15-8, and took first place from the Triangles. The Juniors were again sparked by Kallmeyer, Seibert and Liddell.

## HORSESHOES

The Intramural Horseshoe Tournament will begin Monday, April 5, with Theta Kappa Phi opposing Sigma Pi and the Freshmen opposing Kappa Sigma.

## Lost — One Ten Second Dash Man

It seems that Coach Hafeli is still looking for that 100-yard dash man for his Varsity track team. The story goes that a couple of weeks ago Coach Hafeli was interviewed by a prospective track man who assured him that he could run 100-yard dash in 10 seconds flat. "Hafe" has not seen him since. Have you seen him?

Although our track team is lacking of dash men, javelin throwers, high-jumpers, and hurdlers, the first track meet will be held on April 17 with Washington university. Time trials will take place April 10.

## FIGHTING MINERS

ALLAN D. BEVERAGE

Allan D. Beverage was recently appointed a Naval Aviation Cadet and was transferred to the Naval Air Training Center, Pensacola, Florida, for intermediate flight training, according to the Public Relations Office of that station.

Prior to entering the Naval Service, Cadet Beverage attended the Missouri School of Mines and was a member of the varsity football team there.

Early in November he was sent to the Naval Air Station in Olathe, Kansas where he successfully completed the elimination training course there February 25.

Upon completion of the intensive course at the Annapolis of the Air Beverage will receive his Navy "Wings of Gold" with the designation of Naval Aviator, and will be commissioned an Ensign in the Naval Reserve or a second Lieutenant in the Marine Corps Reserve.

LT. ROBERT E. FIELDS;

Lt. Robert E. Fields recently won his silver wings of a pilot in the Army Air Forces at Turner Field, Albany, Georgia.

Turner Field, an Advanced Flying School, is one of the group of air bases, which composes the Army Air Forces Southeast Training Center. It is here that aviation cadets, student officers, and aviation students are sent out for the final phase in their training which culminates in their receiving their most coveted wings, commissions or rank of flight officer in the Army Air Forces.

Film star Esther Williams, former swim champ, models new swim suit of cotton, made stretchable by double-lock stitch and inner lining.

**SCIENTIFIC POLITICIANS**  
"No politics is to be played in OCD organizations," OCD Director James Landis recently told a conference of his publicity men from OCD regional offices.

Up spoke a man from the Midwest. "Mr. Landis," he asked, "is it true you've hired a political scientist for an important OCD job here in Washington?"

Landis nodded. "Isn't it a fact," the Midwesterner persisted, "that there are two political scientists in the war service division?"

Agani Landis nodded. "Now Mr. Landis," the publicist demanded, "when you hire political scientists, how can you expect us to tell our people out West that OCD isn't playing politics?"

## BIG SCHOOL, LITTLE SCHOOL

Early announcements of the Army and Navy specialized training programs caused concern among college administrators. They glumly foresaw the uniformed programs going to the big colleges and universities with lavish technical resources, expensive equipment and large housing facilities.

With nearly 500 schools now ap-

proved for war training contracts, this fear is rapidly disappearing. Slightly more than a third of the schools selected have a normal enrollment of less than 500 students. The distribution now appears about like this:

Normal Enrollment	Per Cent Total Approved
Under 500	33 1/2
500-1,000	28
1,000-2,000	18
Over 2000	20 1/2

**NEW YORK—(ACP)—**Discovery of a chemical compound that will destroy any offensive odor known to man or beast is claimed by three industrial chemists.

Designated as OD-30, the compound was discovered by Dr. Walter H. Eddy, Columbia university; Dr. James H. Dalbey of Chicago; and Dr. Lloyd Arnold, University of Illinois.

OD-30, its discoverers said, has been successful in killing the odors of stench bombs, skunks, cooking cabbage, fish and butcher shops, dog pounds and public rest rooms.

Dr. Eddy explained the compound literally kills the smells by burning them with oxygen as they float in the air.

### CAPITAL to CAMPUS

ACP's Jay Richter Reports from Washington

#### SO NICE TO COME HOME TO.

WASHINGTON — (ACP)—When OWI explored the questions troubling college students most a few weeks ago, it discovered one of the most urgent was this:

"When they release millions of us from the army after the war, will there be jobs enough to go around?"

The answer to that one depends largely on Congress. The outline for a "yes" answer now lies before it in the epic, 5-pound, 450,000-word National Resources Planning Board report on "Security, Work and Relief Policies."

There's a detailed section in the report on demobilization of men, machines and economic controls when war ends. It says: "We

shall not be content this time to give each man \$6 and a ticket home."

The big suggestions all aim at keeping our economy running during the transition from war to peace. Dismissal wages for soldiers, government supervision of industrial reconversion, aid in opening vast new areas for investment, assistance to industries in need of capital, enforcement of labor standards, initiation of a large-scale public works program—all these recommended policies will mold the answer given thousands of collegians who enter adult civilian life for the first time when they doff uniform.

is a part of the strategy for winning freedom from war. In a war that is more a woman's war than any conflict in history, it's not surprising to find a woman in the background of this blueprint for victory in peace.

She's Dr. Eveline M. Burns, a smartly-tailored, English-born economist who directed research for the report, wrote and edited at least four-fifths of it.

"I felt I should do the index myself, because I know the book so intimately," she says. "All of us who worked on it want it to be a way of educating the people in the needs of the country."

She feels the revelations about the nation's unmet needs are just as important as the postwar plans that have received most publicity so far. Dr. Burns has what she calls "the illusion of an ex-teacher" that if you tell the real story to the people it will be understood and cannot be forgotten.

Dr. Burns came to the U.S. from the faculty of the London School of Economics, to teach at Columbia. She's written "Wages and the State," "Toward Social Security," "British Unemployment Programs." In Washington, she worked on the social security program. Her husband, also English-born, is Arthur Burns, deputy chief of WPB's Office of Civilian Supply.

#### PHYSICAL CODDLINGS— (Continued from Page 1)

Americans, in Kranz's opinion, have glorified the white collar worker and abandoned use of the hands except for getting food to the body and dressing themselves. Even walking is avoided whenever possible, he said.

Kranz blames the high percentage of rejections among older men to what he claims is a misdirected physical training program. "The reason men degenerate so rapidly after 25," he said, "is because they give up the activities of youth and do not replace them with a suitable program."

"If we could create in the minds of men the importance of continuing training after they have given up participation in so-called strenuous games, then we could continue to maintain a high level of body-conditioning well beyond the present age."

In this regard, the Northwestern educator challenges the exercise value of two of America's most popular sports, golf and bowling. He asserts it is a delusion

ALWAYS BEING WARNED TO  
KEEP TRAPS SHUT.

to believe that participation in these sports provides an adequate program of physical fitness. These sports are valuable chiefly for their social relationships and not as conditioners, says Kranz, who shoots golf in the 70's and bowls in the 200's.

Kranz recommends that three parts of the body most neglected in everyday activity be given special attention. They are the abdomen or midsection, the feet, and arms and shoulders, for the first he suggests lying on the back and repeatedly raising the head and shoulders to a trunk-curl position. This is done by contracting the abdominal muscles and should be increased gradually until it can be repeated 60 to 75 times daily. To strengthen the feet he recommends more active use of the toes in walking. For the arms and shoulders he suggests some activity in which the body weight is supported, such as chin-ups or pull-ups.

As a general conditioner, Kranz recommends running according to the individual's capacity. Running, he said, is becoming a lost art and must be revived in order to raise the level of fitness.
